A leaking roof. Clogged gutters. Worn wiring. A warped window or door. Many people think household repairs are minor matters. They keep putting them off.

But blight doesn't wait. It feeds on small flaws, spreads stealthily through neglect and carelessness. Delay causes greater decay, more costly damage. A house can grow shabby much quicker than you think. A minor repair bill can mushroom into a major expense before you know it.

Stay alert. Time is money. Keep the simple things from becoming serious—in your home, in your neighborhood. A few run-down houses can be the beginning of a slum... lower your property values, rob you of local business and school opportunities.
